

SMS Gateway SMTP

Miralix develops software for integration of telephony and data, with the purpose to make the working process easier and to improve the efficiency level in the company.

The concept is based upon the motto; "it's that easy".

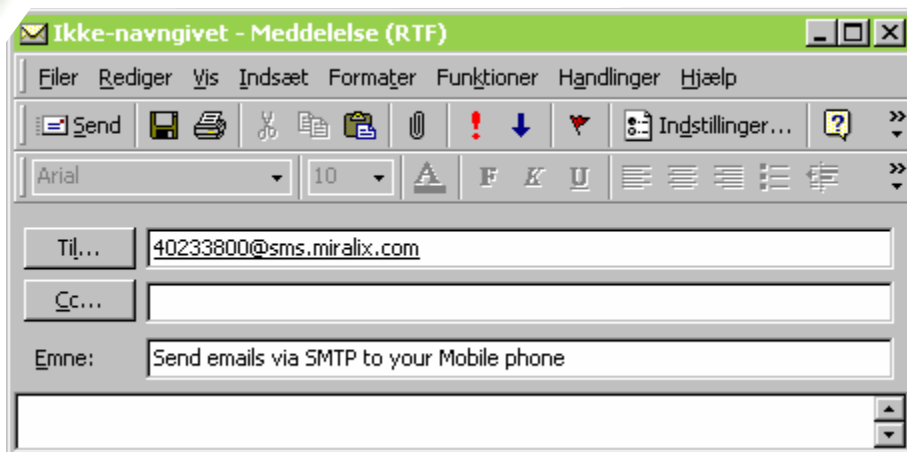

The solutions are very user-friendly and useful for the company, who wants to provide great service and efficiency towards the customers.

Miralix SMS Gateway SMTP is an application, which enables you to receive an email via SMTP to your Mobile phone.

The application differentiates it self from similar solutions with secured delivery and speed being in top because the SMS messages are sent from the company's own SMS modem.

Miralix SMS Gateway SMTP is easy to install and no changes in your company's server has to be made.

The application works by sending a normal email with the single difference that the mobile number of the receiver including the address of the Miralix SMTP Gateway shall be written in the "To" field.

Within a few seconds the employee will receive a SMS message with the text from the email.

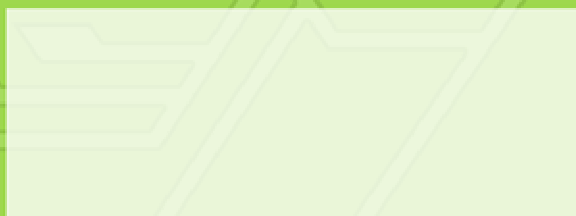

Furthermore you are able to send emails to more than one person. The only thing needed for your company is to register de single groups and their matching Mobile phone numbers.

Miralix SMS Gateway SMTP can easily be connected to the following calendar systems: Microsoft Outlook, GroupWise and Lotus Notes.

Miralix reserves the right to change the functionality without notice, and is not liable for errors or omissions in this information.

System requirements:

PC with Windows 2000 Pro or XP Pro, a SMS modem and Miralix SMS Gateway Pro or Basic
