

Miralix TimeOut is the PC client, which makes sure that your telephone follows your presence and keeps your colleagues updated on your whereabouts!

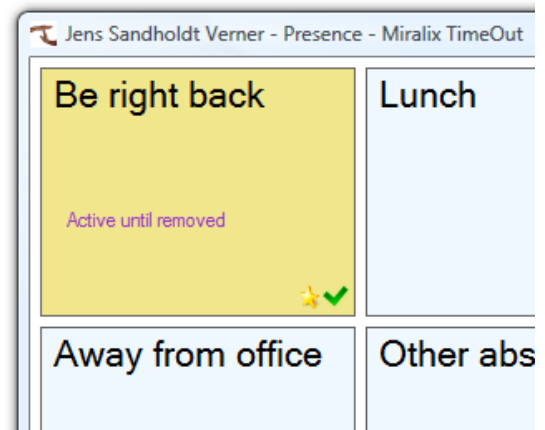

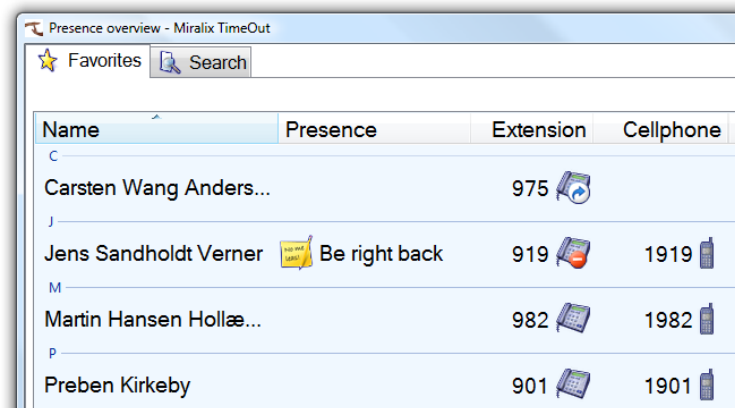

Miralix TimeOut has furthermore a wide range of features, which all makes telecommunications easier in your business - both internally and externally. In this product description some of these features are highlighted.

**Calls are transferred while you're away**  
Who has not experienced the phone ringing at a colleague who is away from his desk for a brief moment?

It is disruptive, time consuming and an irritation for you and the customers!

### Miralix will help you

If you lock your PC, your calls are automatically routed to an alternative telephone number for example cell phone, a colleague or the PC switchboard.

Name	Presence	Extension	Cellphone
C			
Carsten Wang Anders...		975	
J			
Jens Sandholdt Verner	Be right back	919	1919
M			
Martin Hansen Hollæ...		982	1982
P			
Preben Kirkeby		901	1901

**Everyone can see your status**  
In the presence overview colleagues and PC switchboard can easily view your presence and telephone status.

The customer can receive information about your presence, choose to call back later or leave you a message to call him when you return to your seat.

**Customers will always get someone who can either help or give information when you are back. This gives you a more fluid communication, which reflects your excellent service.**

**Unanswered and lost calls are minimized drastically, which also prevents the risk of your customers calling one of your competitors instead.**

With its simple user interface Miralix TimeOut is easy to use for everyone in an organization. Basic functionality includes the most needed features like status display, presence and simple dialing functionality. **Click2Dial** allows you to highlight a telephone number, press your hotkey and make the call.

Add-on modules such as SMS messages, database integration, PC switchboard with TimeOut status etc. can at any time be added to your Miralix TimeOut solution.

... It's that easy ...
